

1151 Bay Blvd Ste D Chula Vista, CA 91911

SAVE -YOUR-ENGINE KIT

- **Monitors Raw Water Flow**

- Sounds audible alarm and activates Red Light panel if cooling water flow stops
- Kits for 1/2" to 3"
- Includes Flow Detector, 85db Piezo Buzzer, and Red Light Panel

Prevents engine overheating due to flow obstruction such as debris, "baggies", or sea weed.
Alerts to flow loss due to intake impeller damage or decreased power.

Constructed of high temperature CPVC material

Design does not restrict water flow

Patented — US Patent No. 4963857 (Liquid Flow Detector)

20062 Save-Your-Engine Kit For hose size 1-1/2"

20063 Save-Your-Engine Kit For hose size 2" and up

20064 Save-Your-Engine Kit For hose size 1/2" through 1-1/4" (Adjustable)

NOTE: Always use a flow detector that is the same size or smaller than the hose size.

For example use a 20064 kit for 1-1/4" hose **NOT** 20062 (which has a 1-1/2" flow Detector)

20064

20062 and 20063
