

# Reflect-A-Bird™

Wind-powered spinning visual bird deterrent

## INSTALLATION INSTRUCTIONS

Thank you for purchasing the Reflect-A-Bird™ – Wind-powered spinning visual bird deterrent. For best results please read these instructions before using and retain them for future reference.

Bird•B•Gone® Reflect-A-Bird is a silent wind-powered spinning visual bird deterrent that

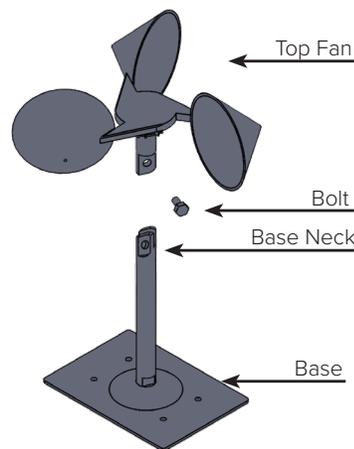

effectively scares birds away. The Reflect-A-Bird's mirror-like design uses sunlight and wind to create a distraction zone that confuses pest-birds causing them to flee the area. The weatherproof aluminum and plastic construction make this bird deterrent ideal for outdoor use. For best results, use Reflect-A-Bird in conjunction with other visual or physical bird deterrents.

### WHAT'S NEEDED BEFORE INSTALLATION

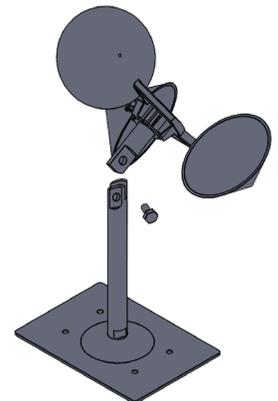

- Screwdriver
- Wrench
- Four (4) #10 screws (be sure to get the type needed for the material you are attaching to, and make sure screw head is larger than ¼").

### HOW TO INSTALL YOUR REFLECT-A-BIRD

1. For best results use in areas with high wind and plenty of sun.
2. Remove base and top fan from box.
3. Remove bolt from top of base.
4. When attaching the Top Fan, align the curved side of the Fan with the curved side of the Base Neck, and insert the bolt provided. [See Figure A]
5. Position the top fan at the desired angle. [See Figure B]
6. Tighten the bolt with a wrench to secure this position. (If bolt does not tighten, reference Step 4 to see if curved sides of Top Fan and Base Neck are aligned properly.)

[Figure A]

[Figure B]

7. Use four (4) #10 screws to attach base to installation surface.

*NOTE: For optimal installation it is recommended that you use screws, not adhesive, to attach the aluminum base.*

Once installed, the Reflect-A-Bird should spin freely in the breeze, catching the sun in the reflective fan, scaring birds as they fly by.
