

HEAVY-DUTY BILGE CLEANER

VL992X

Purpose

Designed to clean the hydrocarbons, grime, dirt, stains, and foul odors from bilges with ease.

Use once per month or as often as needed to keep your bilge clean, and odor-free.

Use on

Bilge cleaner, engine rooms, boat decks, hulls.

Directions

If bilge contains fuel or oil, use absorbent material to soak up as much as possible before using. Properly dispose the absorbent material according to your area's regulations. Pour one quart (32 oz) per 25' of boat into bilge to clean the hydrocarbons, grime, dirt, stains, and foul odors. If boat is smaller than 25', use proportional amount per foot of boat. For dry bilges, add fresh water. Run boat with cleaner for at least one hour, the boat's motion will allow the product to break down dirt, forming a uniform emulsion that can be easily disposed of by draining or pumping out bilge at an authorized pump-out station. Use once per month or as often as needed to keep your bilge clean, and odor-free.
