

CLEAN · POLISH · PROTECT

The Original 7" Buff Ball

No scorching · Self-cooling

Ideal size for large, flat surfaces; fire trucks, boats, semis, aircraft & more.

Fits any 3/8" drill or air Tool. Patented hex shaft provides secure, no-slip hold in tool. Hundreds of felt "fingers" have been assembled into a 7-inch ball for maximum buffing power.

Use on ALL surfaces: Quickly and safely buffs out brake dust, scuff marks, light scratches, oxidation, chalking, tarnish, pitting & corrosion. Power-rated for speeds up to 2500 rpm. Self-cooling. Won't scorch or burn. Won't tear like foam buffers when hitting sharp edges. No exposed ball hardware to scratch surfaces.

Design: Begins as a flat buff pad, but turns into a ball as it spins on the drill. Made with soft, viscose felt separated into "polishing fingers" that conform to concave, convex and irregular surfaces with ease.

Washable & Reusable:

- ★ Machine wash - Tumble dry low
- ★ Hand wash - Soap & water - Air dry

Product Specifications:

White: 7" Viscose felt w/steel hex shaft

Optimum speed: 2000-2500 RPM
