

## Impeller Replacement Kits

FOR ENGINE WATER COOLING PUMPS

Second to an actual mechanical failure of the engine itself, a malfunction of the engine cooling pump would lead to catastrophic results. SPX FLOW's Johnson Pump engine cooling pumps are designed to the demands of engine manufacturers and are built to take rough treatment.

SPX FLOW supplies engine cooling pumps to the world's leading marine motor manufacturers, not just because of our renowned pumps; but also because of the heart of an engine cooling pump: the impeller.

This seemingly unassuming bit of rubber sees to it that the engine always has a sufficient flow of cooling water. If the impeller doesn't do its job, either through wear and tear, fatigue or wrong dimension, you could be left dead in the water with the likelihood of a significant engine repair bill in your near future.

The Johnson Pump brand is synonymous with outstanding impeller performance and quality.

Based in Charlotte, North Carolina, SPX FLOW (NYSE: FLOW) is a multi-industry manufacturing company with operations in more than 35 markets worldwide.

SPX FLOW's innovative, world-class products and highly-engineered solutions are helping to meet the needs of a constantly developing world and growing global population. You'll find our innovative solutions in everything from dairy plants and power plants to oil and gas pipelines, the power grid. SPX FLOW is really everywhere you look.

We help our customers around the globe expand and enhance their food and beverage, power and energy and industrial production processes. For more information, please visit [www.spxflow.com](http://www.spxflow.com)

## Impeller replacement kits

### Lasting quality with SPX FLOW Johnson Pump brand impellers

For the well-being of your boat engine your water cooling pump must be able to supply a minimum specified continuous flow of cooling water. The flexible impeller in your pump, which provides this pumping action, is a wear part. Over time the impeller will lose its ability to maintain the pressure needed for the flow of cooling water and must be replaced.

A good quality impeller will provide you with many months of problem-free operation. For an impeller of lesser quality the performance can degrade so rapidly that you, at best, must replace the impeller more often; at worst, you could be left adrift with engine damage.

SPX FLOW engineers Johnson Pump impellers for outstanding performance!

## What makes Johnson Pump *the* original and replacement impeller of choice?

With SPX FLOW Johnson Pump you get:

### PERFORMANCE

#### STABLE PRESSURE DELIVERY OVER TIME

- Ensures correct cooling flow
- Significantly longer service life...in some applications up to 4x longer than the competition (at a given duty cycle).

#### EXCELLENT SELF-PRIMING CAPABILITY

- Ensures sufficient cooling directly at start up

#### CORRECT IMPELLER DIMENSIONS

- Our impellers are manufactured to strict tolerances for optimal functionality

#### UNIQUE MC97 RUBBER COMPOUND

- Ensures flexibility for self-priming capabilities and minimizes failure due to fatigue (broken blades). Provides stronger bonding to avoid hub slip.

### DEVELOPMENTAL KNOW-HOW

With its Johnson Pump brand SPX FLOW is an original manufacturer of world class impellers for more than 40 years

- More than 125 years of accumulated engineering time.
- Documented, standardized testing
- Continuous quality testing, annually 150,000 test hours
- In excess of 150,000 hours testing of our MC97 rubber compound

### MARINE COMPOUND 97 (RUBBER COMPOUND MC97)

One of our secrets for success is our rubber compound MC97; optimized to provide maximum life, especially for applications where the end user doesn't run the engine on a regular basis:

- Stable pressure delivery over time
- Minimized failures due to fatigue
- Minimized swelling

(Always use Johnson Pump Original Impeller Lube since many rubber compounds are sensitive to petroleum products)

## PRESSURE DROP OVER TIME FOR HIGH QUALITY AND LOW QUALITY IMPELLERS

## PRESSURE DROP OVER TIME FOR JOHNSON PUMP AND TYPICAL COMPETING IMPELLERS

## SHERWOOD / MERCURISER REPLACEMENT PROGRAM

Sherwood / Mercrusier owners can now take advantage of premium replacement impellers from SPX FLOW Johnson Pump; documented superior to the competition. We do not venture into this market lightly. We have prepared ourselves well.

- Engineering time in excess of 2000 hours
- More than 80,000 hours of continuous testing
- Manufactured from our MC97 rubber compound
