

TracPhone® Fleet One

Maritime Satellite Communications

Affordable broadband & voice at sea

Key Features & Attributes

- Most basic and compact marine satellite communications system on the water, just 28 cm (11 in) diameter and 4 kg (9 lbs)
- Perfect for small cruising powerboats and sailboats
- Two options: Fleet One Coastal (coastal data, global voice); Fleet One Global (global data, global voice)
- Voice, email, web access tailored to use
- Rate plans to suit the needs of small and large vessels cruising the coast or crossing the ocean
- Uses Inmarsat's Fleet One airtime service
- Broadband data speeds up to 100 Kbps
- Provides Internet connectivity along the coast, worldwide
- Simultaneous voice and data usage
- Optional wireless router to connect mobile devices onboard
- '505' emergency calling
- World-class warranty coverage and support

Compact, low-cost, and reliable satellite Internet and phone for staying connected on the water

Enjoy the benefit of satellite Internet and phone connections while on the water even from small boats with the TracPhone Fleet One with Inmarsat airtime service. Measuring just 28 cm (11 in) diameter and weighing only 4 kg (9 lbs), the TracPhone Fleet One will fit where larger systems never could. You'll also enjoy the peace of mind of knowing the TracPhone Fleet One supports the free '505' safety service, directing any emergency calls to a rescue center.

Enjoy Internet and phone coverage to stay in touch so you can spend more time out on the water.

Providing data speeds up to 100 Kbps, the TracPhone Fleet One is a great choice for connectivity when cruising outside of cellular service. Service plans supply email, web access, and voice coverage at flexible pricing for recreational and fishing vessels. Stay in touch no matter what coast you're cruising or ocean you're crossing. Fleet One provides

simultaneous voice and data usage, and by adding a wireless router you can connect smartphones and tablets.

Pick from two service plans: Fleet One Coastal (for coastal data and global voice), and Fleet One Global (for global data and global voice).

The extremely compact size and minimal weight of the TracPhone Fleet One system make it easy to handle so installation can be done quickly. Simple connections between the antenna unit and the belowdecks unit also contribute to the ease of use. The rugged antenna unit is designed to withstand even the harshest marine

environment, ensuring reliable performance everywhere the boat may travel. With data and voice plans and flexible pricing that meet one-time, occasional, seasonal, and regular usage, you can spend more time on the boat with TracPhone Fleet One Coastal and Fleet One Global.

TracPhone Fleet One Antenna System

Service	Inmarsat Fleet One Coastal (coastal data, global voice) Inmarsat Fleet One Global (global data, global voice)
Antenna Unit (diameter x height)	27.6 cm x 29.2 cm (10.9 in x 11.5 in)
