

ZAMBEZI

Pontoon Boat Light

Surface Mount Underwater light

NEW FOR 2018

SPECTRUM™
COLOR

4" Dia. X 1.6" D

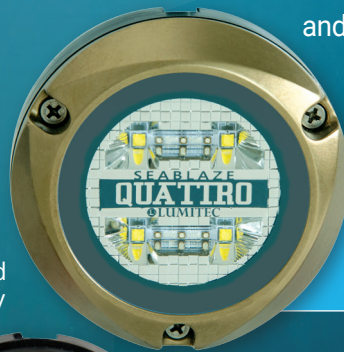

Available in Dual Color & Spectrum

Surface Mount Underwater Light with no through-hull wiring holes required.

Zambezi underwater light, like its namesake (Zambezi is an African bull shark) is tough, tenacious, and built to survive completely submerged in salt or fresh water. Zambezi's wire and seal are the result of more than 70,000 hours of ingress and long-term permeability testing. This completely sealed surface mount design allows lights to be applied to situations that require surface run wires. From pontoon boats to floating docks, the application possibilities are limitless for this versatile and durable surface mount underwater light.

Mounts to a standard transducer/accessory bracket

Zambezi Quattro

Surface Mount LED Underwater Light
