

IN A CLASS OF ITS OWN

ANOTHER INNOVATION BY ICA GROUP, **NAUTIKFLÖR** IS STILL THE ONLY PRODUCT OF ITS KIND

NAUTIKFLÖR IS A LIGHTWEIGHT, WATER-RESISTANT, NAUTICAL THEMED FLOOR COVERING SYSTEM WITH THE LOOK AND FEEL OF REAL WOOD.

The commercial grade planks are produced in Switzerland exclusively for ICA Group. Our sophisticated, high definition printing process allows us to print our hardwood and holly line design with extreme precision. Custom designs are also an option, an innovation which is only offered by **NautikFlör**. The versatility and durability of the planks make it ideal for boat life, with a resistance to wet and salty conditions. The non-absorbent nature of the flooring makes it sanitary and easy to clean even in wet or humid conditions. Common applications include hotels, restaurants, kitchens, bathrooms, and bedrooms. The planks can be glued down or used as a floating floor. Cutting **NautikFlör** is as easy as scoring and snapping, assuring that hatch accessibility will never be an issue.

Available in 6 standard color combinations, Cherry & Holly, Cherry & Black, Natural Teak & White, Natural Teak & Black, Teak & Holly and Teak & Black. Contact us to discuss custom color options. Accessories include compass rose designs for each color combination and Nautikwall is available in all 3 standard colors without the nautical line.

NAUTIKFLOR COMPASS ROSE

TECHNICAL INFORMATION

The compass rose is 528 mm (20 4/5") in diameter and is HD printed over 3 floor boards . These can be used to add a detailed nautical look to any floor area and even table tops.

CUSTOM OPTIONS

Custom logos, designs and images of a similar size can be provided by the customer and HD printed into this area as well.

NAUTIKWALL

CHERRY

NATURAL TEAK

TEAK

TECHNICAL INFORMATION

Nautikwall, is a 4 mm (1/8') thick PVC wall panel measuring 610 mm x 1220 mm (2' x 4') that covers an area of 0.74 s.m. (8 s.f.). The panel is flexible and light weight with a cork backing for sound absorption. **Naurikwall** is easy to cut and install using the same Fixtech adhesives used with **Nautikflor**, as provided by ICA Group. It comes in three standard colors to match **Nautikflor**, Cherry, Natural Teak and Teak.
