ParFit™

Spin-On Gasoline Fuel Filter/Water Separator for Marine Applications

Overview

Introducing the **ParFit™** marine fuel filter/water separator for all inboard, outboard, two and four cycle gasoline engine applications. The PFF5510 has **Aquabloc®** 10 micron rated media, guaranteed to outperform standard gasoline filters.

Applications

The **ParFit™** PFF5510 gasoline fuel filter/water separator replaces standard filters in all of the most popular marine gasoline engine applications. Applications include Mercury, Mercruiser, Yamaha, Suzuki, Honda, and Tohatsu.

Product

The **ParFit™** PFF5510 gasoline fuel filter/water separator was laboratory tested by Racor to SAE standards to guarantee optimum durability, capacity, and water removal performance. The PFF5510 is treated inside and out with highly corrosion resistant coatings to eliminate rust-through.

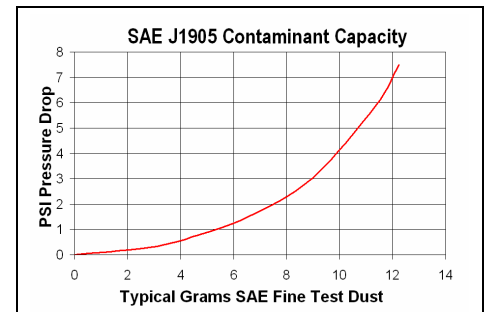

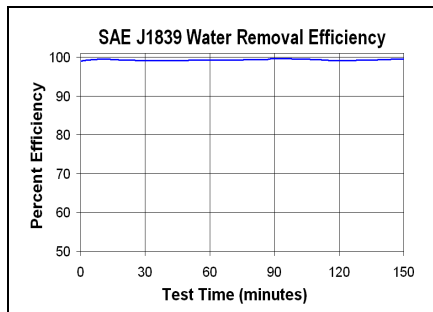

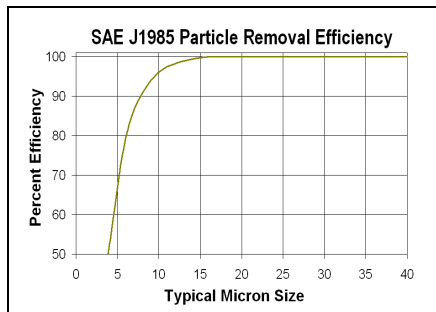

Features and Benefits

- Racor certified manufacturing practices insures superior construction and performance quality.
- **Aquabloc®** filter media developed by Racor filtration experts means better engine protection compared to other low cost fuel filter brands.
- High contaminant capacity and 96%@10 micron particle removal efficiency makes this filter suitable for all low or high pressure injection systems.
- 99% efficient **Aquabloc®** water repelling filter media.
- Performance exceeds OEM specifications.
- 11/16" -16 threads for the most popular applications

**FOR ALL INBOARD AND
OUTBOARD GASOLINE
APPLICATIONS**
