

Hour meter Instructions

Use for: Motorcycle, ATV, Snowmobiles, PWC & Marine or any Gasoline Engine

EASY INSTALL:

1. Choose a location where the pick-up wire (included) will reach from the meter to the spark plug. Motorcycles mount to the frame behind the steering stem with 2 sided tape (included). Wrap pick-up wire around spark plug wire or coil and route to the mounting area you choose.
2. If you choose to drill 7/64" holes for mounting screws DO NOT DRILL INTO GAS TANK, ENGINE CRANK CASE OR OIL RESERVOIR FRAMES. If in doubt, contact your local dealer.
3. Loop pick-up wire into meter through holes. Fasten Meter to mounting surface with tape or screws. Test installation by running engine, hour glass icon on meter will blink if installed correctly. It is ok to trim excess wire.
