

One wire to Security 1 or 2 and one wire to BATT NEG/Ground

Use adhesive/superglue to fasten magnet to snap/button on cover

Installation Instructions:

- 1.) Replace a snap cover snap with the Siren Marine Snap Cover Sensor
- 2.) One wire connects to either of the inputs labeled either "SECURITY 1" or "SECURITY 2"
- 3.) The other wire connects to the terminal labeled "BATT NEG" or to the common ground
- 4.) Use adhesive such as a super glue or marine epoxy to fasten the magnet into the corresponding snap on the canvas cover
