Shackles

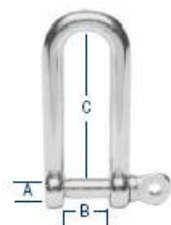

Standard "D" Shackle 316 Stainless

Our **Stainless Steel Standard "D" Shackles** are made with high corrosion resistance stainless steel. These **Stainless Steel Standard "D" Shackles** have a 5 to 1 WLL which rates our Standard "D" Shackle's WLL at 20% of its Ultimate Breaking Strength. The WLL is the maximum load that should ever be applied and is based on an in-line pull with no shockload. A

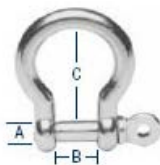

competent person should make an assessment of the conditions of use to determine the maximum load allowed. Our **Stainless Steel Standard "D" Shackle** has a screw pin which allows the pin to be removed from the body of the D Shackle.

Safety Bow Shackle 316 Stainless

Our **316 Stainless Steel Bow Shackles with a Safety Pin** are made with high corrosion resistance stainless steel. This Safety Pinned Bow Shackle includes a Stainless Steel Safety Pin as an added measure which prevents the nut from detaching from the bolt, if it were to become loosened. These **Stainless Steel Bow Shackles** with a Safety Pin have a 5 to 1 WLL which rates our Bow Shackle's WLL at 20% of its Ultimate Breaking Strength. The WLL is the maximum load that should ever be applied and is based on an in-line pull with no shockload. A competent person should make an assessment of the conditions of use to determine the maximum load allowed. Our **Stainless Steel Bow Shackle** has a screw pin which allows the pin to be removed from the body of the Shackle as well as a Safety Pin to keep the nut and bolt in place.
