

### Exclusive feature: SmartLoop

Product can adapt to suit all needs and users.

SmartLoop lets you:

- turn a single webbing tether into a double webbing tether (see fig. A)
- turn a double webbing tether into two single webbing tethers (see fig. B)

Fig A

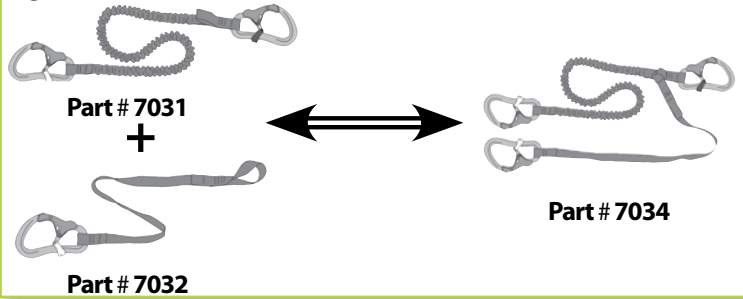

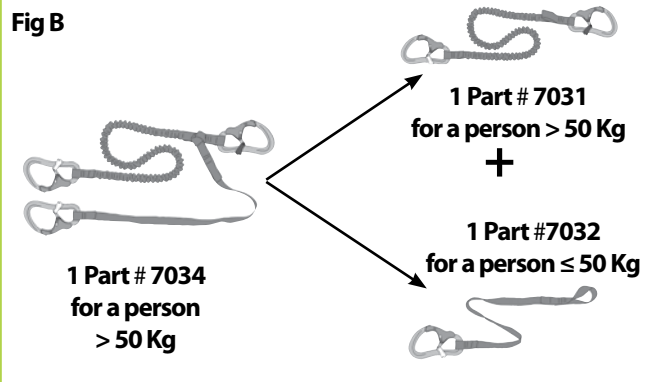

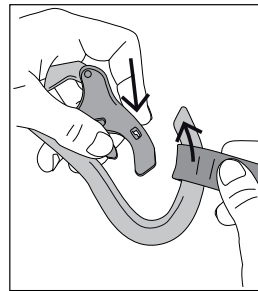

Fig B

### Exclusive feature: EcoLogic

Removable snap hook lets you increase the lifespan of the product by replacing the webbing only.

Our exclusive EcoLogic feature makes ProLine a budget-friendly range!

#### Tip: using a short tether

Wichard manufactures two types of short tether (0.8 m and 1.4 m) for persons weighing less than 50 kg. For adults weighing more than 50 kg, short tethers can be used in conjunction with a ProSnap snap hook (Part No. 2459).

#### Special materials for less weight and greater performance

Wichard carefully selects materials (aluminium, carbon fibre, etc.)

> ProSnap snap hooks are forged in special aluminium to ensure excellent rustproof qualities and minimum weight.

> ProLine webbings are designed with materials that absorb very little water and dry quickly.

Choose your tether (as per ISO 12401:2009)			
	> 50 Kg	≤ 50 Kg	≤ 50 Kg
